Mr. Tobechukwu Uba	Head Exams and Records
Hajia Halima Ahmed Haruna	Head Education
Mr. Abdulmalik Saidu	Head Reform Coordination and Service Improvement
Mr. Aminu Haruna	Head Planning, Research and Statistics
Mr. Hussain Sani Danmisa	Head Internal Audit
Mrs. Champion Afolayan	Zonal Coordinator, South-West, Lagos
Mr. Umar Sani	Zonal Coordinator, North-West, Kaduna
Chief E. Ukariwe	Zonal Coordinator, South-East, Enugu
Mrs. Therisa Asemota	Zonal Coordinator, South-South, Calabar
Mrs. Debora Abang	Zonal Coordinator, North-Centre, Kogi
Mr. Aliyu Isa	Zonal Coordinator, North- East, Maiduguri

Mustapha Heralds The Board As The Second Substantive Registrar/CEO

BY **ABAJI FATIMA AGNES,**
anipr,mnuj

Leadership is the capacity to translate vision into reality...Warren Bennis words succinctly describes him. Born on 5th July 1967, in Bama Local Government Area of Borno State, Babagana Mustapha undoubtedly a man of few words with a broaden vision assumed office as the second substantive Registrar/CEO of Health Records Officers' Registration Board of Nigeria (HRORBN) on the 13th of July, 2021 upon completion of the tenure of the first substantive Registrar/CEO, Mohammed Ibrahim Mami. A Kanuri man with an upbringing under the tutelage of his father, a renowned Islamic Scholar cum farmer, had his early education at the then Old Bama Primary School, in Bama Local Government Area of Borno State, where his leadership strides were noticed by his teachers as his brilliance and coordination of activities amongst his classmates left no one in doubt that he was destined for greater heights. Upon a heroic graduation from primary school armed with first school leaving certificate in 1979, admission into secondary school was a mere formality as he enrolled into form1 in 1980 where he left with a West African School Certificate in 1985. Thereafter, proceeded to Borno College of Basic Studies (BOCOBS) in 1986, graduated in 1988 armed with his IJMB result,

ready for a Degree programme but opted for business in Petroleum resources which at that time was very lucrative till 1990 when he left, scouting for a Government employment for proper job security. After obtaining his first degree, desirous of excellence and more academic qualifications, he went for a Post graduate Diploma in

Registrar/CEO Alhaji Babagana Mustapha

Education (PGDE), University of Maiduguri, 2007-2008, feeling light feathered with a first degree and post graduate degree, he went further to cap it with an MSc in Health Information Management from the prestigious Maryam Abacha American University of Niger (MAUN), Maradi, Republic of Niger, 2019-2021

His journey to the peak spawned over the years from being a clerical officer, department of

Records,UMTH,1991-1994, Head of Outpatient, PHRO, Department of Health Records, University of Maiduguri Teaching Hospital, 2002-2003, Tutor/Students Affair Officer, School of Health Information Management, UMTH, 2003-2010, Chief Health Records Officer, Coordinator, School of Health Information Management UMTH, 2011-2015, Chief Health Records Officer, Head, Department of Health Records, University of Maiduguri Teaching Hospital, Maiduguri, 2017-2019, Assistant-Director, Health Records Management, Head, Professional Matters, Health Records Officers Registration Board of Nigeria, 2019-2021 and Deputy Director, Health Records Management, Head, Professional Matters, Health Records Officers Registration Board of Nigeria 2021 before assumption of office as the Registrar/CEO. He is currently undergoing a PhD programme in Health Information Management.

Therefore, it was no surprise when President Muhammadu Buhari found him worthy in learning and character to appoint him to pilot the affairs of the Board as Registrar/CEO through the Honourable Minister of Health, Dr. Osagie Ehanire.

The profession and Board are delighted to have him pilot the affairs of the Board in the next four years. A renowned Health Information Management expert, Babagana Mustapha is happily married with children.

Hurray!!! Another plus to the Governing Board, Management and staff of HRORBN, the bells are tolling hinting us that history is about unveiling as core curriculum and minimum academic standards (CCMAS) has been approved and released recently by the National University Commission for the training of Health Information Management at degree level as the Nigeria Health sector cannot maximally function, without comprehensive HIM, which is the backbone of Health Information System (HIS).

In the same vein, the Board has succeeded in reviewing the training curricula for HND and ND in collaboration with NBTE to improve the

training standards of the profession for better output and productivity. As part of the transformation and continuity agenda of the Registrar, he is set to revamp the HIM profession so as to compete favorably with other stakeholders in the health sector, the Board's advocacy visit to National Hajj Commission of Nigeria and National Primary Health Care Development of Nigeria, is in the process of yielding positive result as this is so dear to him.

This edition of the magazine show case the different plans of the Registrar for the year, numerous advocacy visits and how he intends to improve staff welfare for quality productivity as well as two other intriguing ,interesting besides

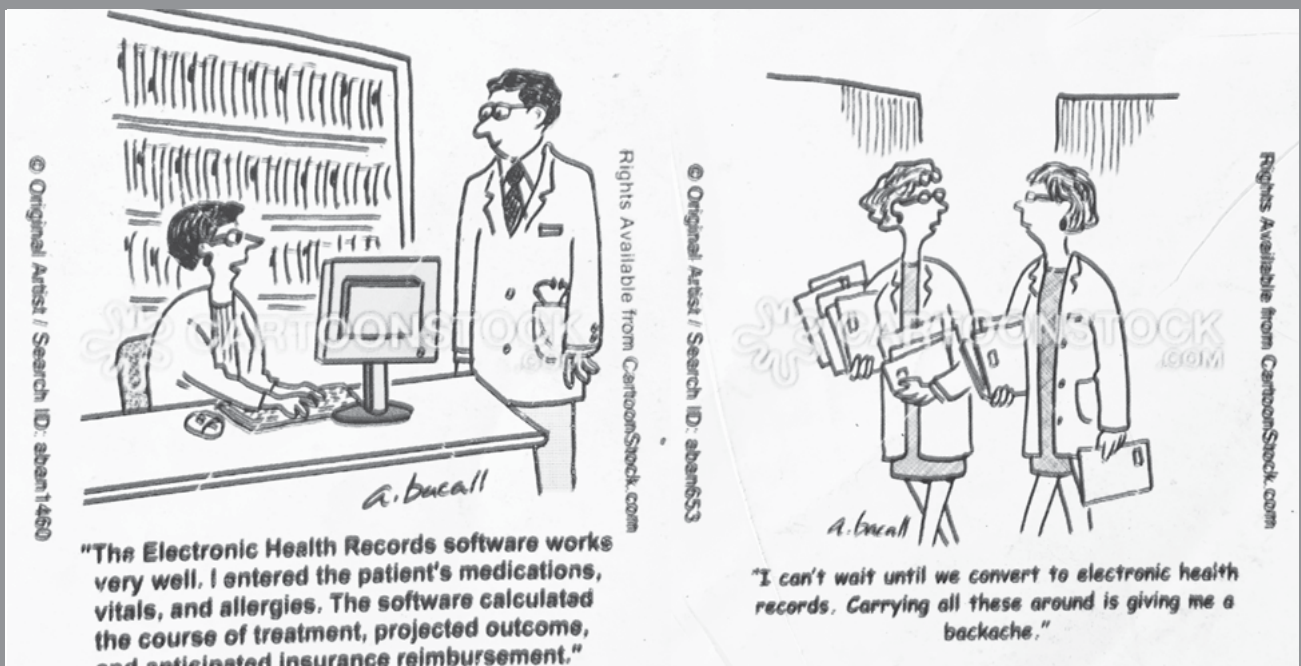

explosive interviews from Examination and indexing departments.

Other fascinating segments are the two communiqué and photo splash which will keep you updated with the activities of the Board.

I implore you to enjoy this sensational and robust edition of the HRORBN News Magazine as it is enlightening, educating and inspiring.

COVER

... Review of HIM Curricula: A Welcome Development

BY ABU USENI

The mandate of the Health Records Officers' Registration Board of Nigeria (HRORBN) clearly bequests on the Board, amongst other tasks, the responsibility of determining the standards of knowledge and skill to be attained by a person seeking to become a member of the profession of Health Information Management; and improving those standards from time to time for practitioners and institutions undertaking HIM discipline as a course of learning. Pursuant to this mandate, HRORBN, in collaboration with the National Board for Technical Education (NBTE), decided to review the HIM curricula in November/December, 2022.

Recall that the last review in 2014, about eight years ago became obsolete, thereby giving rise to a more modern and advanced one; knowing how rapid knowledge/technology evolves, review of such should have been frequent. The goal and intent to review the HIM curricula has always been in the offing over the years without much progress. Seeing the light of the day under the leadership of our dynamic, proactive and reactive Registrar/CEO, Alhaji Babagana Mustapha is a welcome development desirous of a laudable applause. His efforts towards achieving this all-important measure could only have steamed from the desire to bring our HIM practitioners to an acceptable global level of exposure and global best practices.

In appreciation of the

Board's contribution to the successful review of the HIM curricula, the NBTE's Executive Secretary, Professor Idris Muhammed Bugaje extolled her for the synergy, resources and commitment displayed, as he went further to state that the quantum of attendees (both resource/participants) goes a long way to show the prominence placed on the review by HRORBN in ensuring and achieving a standardized curricular, which can compete favourably anywhere.

Health Information Management, being one of the cardinal professions in the health care service whose importance can never be over emphasized, and should be harnessed appropriately for the gains it holds. The American Health Information

Cont'd on next page >>>

<<< Cont'd from previous page

Management Association's definition of HIM amply supports HRORBN's effort at seeing this review through. It defines HIM as the "practice of acquiring, analysing, and protecting digital and traditional medical information vital to providing quality patient care." It is a combination of business, science, and information technology."

Therefore, the assemblage of seasoned professionals, who worked on the revised version of 2022 curricular, was indeed worth their salt as the work was methodical, with a review process well spelled out and clarified. In order to accomplish their aim, twogroups were created to work on the Higher National Diploma (HND) and National Diploma (ND) curricula respectively. Group "A" had Dr. B.M. Oweghoro (the team leader), Mr. Wada Aliyu, Mr. Lucky Agbonzikilo, Mr. Abubakar Abdullahi, and Mr. Adeleke Ibrahim Taiwo as members. While group "B" had Dr. Adebayo Tajudeen (the team leader), Mr. Abdu BaffaTarauni, Mr. SalihuMuhammod-Rabiu, Mr. Gidado Atanda Samson and Mr. Muhammed Danladi as members.

To ensure that the groups' efforts met the desired goals of HIM, they were placed under the supervision and coordination of Professor M.A.T. Suleiman and Hon. Ibrahim Jibrin Sokoto (The Board Chairman). The effort of the aforementioned professionals produced the 2022 HIM curricula. The adjustments made are

categorized and listed as follows:

NATIONAL DIPLOMA (ND)

New courses added

1. Probability theory for HIM
2. Language for Medicine
3. Demography 1
4. Anatomy and physiology 1

“It defines HIM as the “practice of acquiring, analysing, and protecting digital and traditional medical information vital to providing quality patient care

Courses removed

1. Statistical theory for HIM
2. Fundamental for Medicine
3. Operating System
4. Medical Demography

Courses merged

1. Descriptive Statistics 1&11
- HIGH NATIONAL DIPLOMA (HND)**

New Courses added

1. Fundamental of Health Data Analysis 11
2. Fundamental of Medicine
3. Introduction to Inferential Statistics for HIM
4. Health Data Management
5. Demography 11
6. Time series
7. Hospital Statistics 11

Courses removed

1. Information Organization

and representation

2. Quality Improvement in Healthcare record keeping
3. Principle of Epidemiology and Disease Control
4. Population Resource and Environment

Courses Merged

1. Design and Analysis of Experiment

Being a product of robust engagement, the 2022 HIM curricula is ground-breaking and long envisaged. Its outcome has once again placed HRORBN on a pedestal worthy of emulation as more frontal responsibilities in terms of advocacy and sensitization to all relevant stakeholders regarding the implementation of the reviewed curriculum, ensuring that capacity building is carried out by tutors and lecturers in health information management. It is intended to bridge knowledge and skill gaps for proper implementation across all levels of government.

The Board has in the recent past, spent ample time laying foundation for the growth and development of the profession, by making frantic efforts in improving the quality of our training institutions; as well as introducing train-the-trainers programme. All these are geared towards positioning the profession to confront the challenges that lie ahead. And there is no doubt that the Board will deliver on its obligation/mandate in ensuring the new HIM curriculum gets the attention and applicability it is designed for.

ONE-ON-ONE WITH REGISTRAR:

The Registrar in an interactive session tagged ONE ON ONE WITH THE REGISTRAR delved into his mission for the Board having staff welfare topping the list amongst others.

By Mrs. Abaji Fatima Agnes, Abu Useni, Unwuchola L. Ufedo and Ifeanyi P. Nwaokolo

HRORBN NEWS MAGAZINE: What are your programmes for the year, and how do you intend to achieve them?

REGISTRAR/CEO: I welcome you all to my office and delighted to have this awesome interactive session with you. Thank you, my programmes for the year are numerous in the sense that I have to categorise them into cliques to enable me achieve them at the stipulated times. I reiterated in my speech marking my first year in office in 2022 that I am building on the legacies of the immediate past Registrar/CEO as my administration is a continuation of the former administration. Along the line, some adjustments could be made where and when necessary. Topmost on my agenda for the year is the education of our professional colleagues nationwide, as we need to catch up in terms of broadening our horizon to be able to compete favourably with other health professionals globally. For instance, very few are PhD holders, besides we do not have any professor in the Health Information Management profession. About 70% of our professionals are HND holders, and you all know that HND in the Federal Civil Service has its terminal point, which is level 14 (Chief), a cogent reason for the introduction of an abridgement programme, where most of our HND holders are expected to go for a short duration course and get their BSc for career progression. Glad to inform you also of the introduction and running of BSc in Health Information Management programme in public universities all over the country.

As part of our progress report, late last year, we were able to get approval for CCMASS (Core Curriculum and Minimum Academic Standard) from NUC (National University Commission), and it was published. We have also set up few committees to look into it as,

it was discovered that there were no introductory courses, which ought to be the CCB mark being an integral part of the programme. Some reports on the inclusion of the introductory courses have been submitted for further scrutiny and possible additions/subtractions. Any moment from now, meeting of a sort will hold in Abuja with the relevant stakeholders to harmonize all the corrected CCB marks and submit them to NUC for approval before we start issuing them to the universities interested in introducing/running our programme. We also have a call ratio of other institutions with the intent of running post graduate diplomas, some are already offering Masters' degree programmes while some are offering PhD degree programmes. There are about 3 or 4 universities running these programmes currently, (which has helped our professionals tremendously in career progression) as the obtainable process is getting a BSc i.e. first degree (bachelors) rather than the regular HND (Higher National Diploma) before attaining the Directorate cadre in the Federal Civil Service work force. These are part of our cravings this year; for our professionals.

Secondly, we are looking into the training institutions, especially those training for professional diplomas, National Diplomas and Higher National

Diploma, to see that they have established at least the minimum standard required for running HIM programme. We strictly adhere to the bar; this has contributed immensely to some slide in the performance of our students as we have warned all the invigilators to be very strict during invigilation at schools' examinations. We have also come up with innovations and techniques to see that the examinations are collated without any hitches or leakage. This feat is quite laudable as a lot of people have testified to its efficacy, especially those involved with training. The situation is so glaring, seeing a remarkable improvement in students' performance during the recent marking exercise as we are yet to make any official statement on that. We will continue to adhere to the standard no matter the number of candidates we produce. Elimination of quackery in the profession is another herculean task, almost becoming a dreaded monster to deal with; as many healthcare facilities are in the habit of employing and deploying, non-professionals, non-health personnel, to carry out the responsibilities of Health Information Management professionals. All professionals are expected to have up-to-date licenses, improve on their already acquired skills, as a lot of awareness and sensitization with the key stakeholders

[Cont'd on next page >>>](#)

Registrar/CEO Alhaji Babagana Mustapha

<<< Cont'd from previous page

is on-going. Most of these organizations request for up to date licensing during promotion exercise for their staff which is a plus to the profession. We constantly lay emphasizes on the significance of license renewal during accreditation as it is very essential. Hopefully before the end of this year, it is our hope that we will see at least 90% of people working in the department of HIM are HIM professionals. Complete eradication of quackery is a gradual process which treading cautiously as it involves a whole lot of process.

The Board is working towards having all of its work activities computerized as this is a global trend which we can't be seen not to be tagging along. We have started with Indexing besides Examination and Records Departments which are the two foremost amongst other crucial departments; the software programmer will do a test run of the programming so that during exams and indexing, we will have a seamless process without stress. The programming will be concluded before the middle of the year. Staff welfare is foremost on my agenda, as we have taken into consideration all necessary steps/actions to ensure it is achieved this year by setting up a committee to handle that. Interested Staff are at liberty to go for in-service training to increase their knowledge as approval will be granted as far as they meet up the required criteria, on the job training both internal and external will run concurrently too, in house training will be revived as any staff sponsored for training would in turn come back to share the knowledge and skills acquired with other staff as the case demands or professional trainers can be invited for in house training as well etc. To the best of our capability, we will make sure all staffs benefit from this gesture before the end of the year. These are part of the essential points for our plans for the year.

HRORBN NEWS MAGAZINE: Sir, just to buttress your discussion on foreign trained graduate of HIM and to throw more light on assumption into the system upon graduation knowing fully well your passion for the growth of HIM professionals, as it is a common feature amongst other health professionals when their foreign graduates come back home; for instance the Nursing council; after scaling through the written council

Registrar/CEO Alhaji Babagana Mustapha

exams, an induction is conducted for them to absorb them fully into the system. We have not had such in the HIM profession especially in this era of war against quackery, If you do not induct your foreign trained graduates, how do you intend to eliminate quackery, at least to the barest minimum?

REGISTRAR/CEO: For the induction of foreign trained professionals, a year ago, a committee was set up to develop a guideline for the foreign-trained professionals to register and carry out our Boards professional licensing examination. This committee developed a blueprint in collaboration with or rather loaned ideas from similar Boards and councils like the Medical Laboratory Council which helped us in fine tuning our scope to align appropriately. Thereafter, we developed our own blueprint and are ready to present it to the governing Board for adoption and set it as apolicy for implementation.

However, when a foreign trained HIM graduate applies for a professional licensing examination; we send the person's name and documents to the Ministry of Education to verify the authenticity of their school and studies. After that, we allow that person attach himself/herself to an approved health facility for six (6) months; before registering for his professional licensing examination. Owing to the number of foreign trained professionals,(very few, at times not even up to 10) sit for the professional licensing examination which is one of the setbacks hindering the Board from conducting ceremonious induction. We permit the few available candidates

to register with any Board accredited institution of their choice to write the license examination, and also have their inductions there. At the last Board meeting, we introduced a policy that all institutions should organise inductions for their prospective graduates in professional diploma, National Diploma and High National diploma, alongside the degree holders. If the schools comply with the policy in one or two years, we will start having such grand inductions. Hopefully, inductions will be conducted by the Board for all successful graduates both foreign trained and home based trained.

HRORBN NEWS MAGAZINE: Schools that confidently admit more than the approved number of students believing there is a window for paying a penalty fee, besides the issue of admitting unqualified students who need to be qualified before writing exams because they know there is room for indexing. Sir, has it been checkmated?

REGISTRAR/CEO: At the last coordinator's meeting, a circular was issued on prohibition of late indexing, stressing on every candidate's qualification before indexing. The penalty for late indexing is the school's forfeiture of any money paid; only apply if you are qualified. The number of candidates to be indexed is stated in the circular. The Board's interest is in the quality of education and the availability of resources in the institutions.

HRORBN NEWS MAGAZINE: What is the Board's punitive measure for a school that goes overboard the specified number of candidates?

REGISTRAR/CEO: We call their attention to the anomaly and if they are

<<< Cont'd from previous page

all qualified, we then advise the school to introduce and organize a reading examination; after this exercise, names of successful candidates will be sent to the Board for indexing. Strength of the school will be considered also. The specified number of candidates for public institutions is different from that of private institutions.

HRORBN NEWS MAGAZINE: In a recent random survey of students admitted into schools and colleges of Health Technology to study Health Information Management, it was discovered that a whole lot of them accidentally found themselves enrolling for HIM after not meeting up the required qualifications for their choice courses claiming HIM was not their original choice, so some grudging pull through hence the lack of interest in studying hard which sometimes leads to malpractice during examinations. What is the Board doing to correct this impression?

REGISTRAR/CEO: Compared to other professions, you may get some students that find themselves accidentally in HIM. Not until my appointment into HIM department of University of Maiduguri Teaching Hospital (UMTH) in 1991, did I know what it was all about. I learned everything about HIM on my job developing interest which grew over time. As I was not even aware of a profession called HIM or a school that trains Health Records Managers etc. I acknowledge and commend the efforts of Association of Health Records and Information Managers in Nigeria (AHRIMPN) on creation of awareness as a lot of people are now aware of the profession and the roles they play in hospitals and health centres.

Secondly, the Board deserves a lot of commendation as we are on top of the game especially in areas of publicity, though not yet uhuru, we are very hopeful we will get there some day in sha Allah. Finance has been constraint as a lot which needs to be done especially in Media related domain is incubating awaiting any little boom to let it loose. But I can assure you that as soon as everything is set, not only the Board but in alliance with AHRIMPN, we will swing into action as publicity is a necessity in every sphere. For instance, the North West Zonal office, (the Kaduna office,) and the South-West Zone (Lagos Office) visit radio stations occasionally for publicity to run different programmes on HIM, either in indigenous languages or English which is quite commendable as this is another measure to Creating awareness on the profession. We are targeting town meeting hall meetings for same purpose sometime soon. The main thing is for the lecturers to make the student clearly understand the in-depth meaning of the HIM course.

HRORBN NEWS MAGAZINE: Could we have a single database for collating the patient's electronic health data?

REGISTRAR/CEO: The problem is that most of our other professional colleagues need to understand what EHR is all about. E-health records aim to easily access patient health records in any hospital visited in the nation. Here, we cannot have independent EHR. We cannot even have an institutional base EHR, not to talk about the national EHR. We don't have to train only Health Record professionals but all health care professions. Abroad, they have a patient health record. When you visit a hospital, you collect a card containing a chip with all your health information; when you see another hospital, you will present your card with the chip. When slotted into

Registrar/CEO Alhaji Babagana Mustapha

the computer system, all your health information will pop up, helping the hospital to know where and how to start your treatment. National hospitals are gradually phasing off paperwork. That's why in my project, I wrote about EHR. There is no uniformity in a Nigerian hospital. If they are standardized, it will be easier to harmonize them. The system of a private hospitals is using are quite different from government hospitals. Most private hospitals are paperless. We can have a standard EHR with the support of the Ministry.

HRORBN NEWS MAGAZINE: Is there any move the Board has made to implement this into the system?

REGISTRAR/CEO: Yes, we are working hard and have come up with a blueprint. We expect every hospital to have a basic EHR with the provision of the blueprint. Each hospital will get the one that suits its environment.

HRORBN NEWS MAGAZINE: Do we have a database to know the exact number of qualified and registered professionals with their complete details?

REGISTRAR/CEO: Yes, there is a database. That is one of our mandates. We register and also keep the register. The Board plans to have an up-to-date registered health record professional in this magazine. We will see it up to date quarterly for easy access.

HRORBN NEWS MAGAZINE: As the CEO, Sir, what are you doing in providing a befitting office and conducive accommodation for the Board?

REGISTRAR/CEO: Well, even before my arrival, the former CEO had done his best to see that we get our own office within Abuja territory; after I resumed office, I wrote a reminder for quick intervention to that effect. Paying rent yearly is of great concern to us. We have included it in our capital project and may get approval soon. We pray we get our land before the end of the year.

HRORBN NEWS MAGAZINE: Is there a move to make the Board a council?

REGISTRAR/CEO: Yes, there was a move to make the Board a council. It has passed the first and second readings, waiting for the concordance reading by the two houses.

Curricular review for National Diploma (ND) and Higher National Diploma (HND) in Health Information Management (HIM) and newly released Core Curriculum and Minimum Academic Standards (CCMAS) for Health Information Management prospects and possible challenges to HIM practice in Nigeria

Health sector globally is a fast growing sub-sector of the social services. In the same vein; Health Information Management (HIM) is transiting from the traditional way of practice to involve Information and Communication Technology

(ICT) which is required for the provision of fast, accurate, reliable, complete and timely health information for planning and informed decision making.

Health Records officers' Registration Board of Nigeria (HRORBN) as a Regulatory

Agency/Body for Health Information Management (HIM) in Nigeria has earmarked a lot of resources to reform the HIM training and practice in the Country. The Nigeria Health sector cannot maximally function without comprehensive HIM which is the backbone of Health Information System (HIS). In recent times, HIM training and practice has been technologically driven; However, in the course of evolution, the profession has over the years witnessed a lot of challenges due to inadequate Human resources, infrastructures, and proliferation/advancement in Information Technology. While these challenges continued to impose negative impact on the profession; it's training in Nigeria remains at lower Cadres (ND/HND) for decades. Trainings are still domiciled in Schools of Health Information Management under the University Teaching Hospitals and some Colleges in the Country. This ugly situation has resulted in inconveniencing some professionals to cross the shores to other countries to study Bachelors of Science in Health Information

Mr. Abubakar Magaji, Head Professional Matters

Cont'd on next page >>>

<<< Cont'd from previous page

Management (Bsc HIM). As a result of non-availability of public Universities in Nigeria which run BSc in HIM. The curricular used in training ND/HND are obsolete and long overdue for review since (2019) as the last review was carried out in 2014.

These menace mentioned above roused the Board to start thinking out of the box and finally resolved to source for solutions which include but not limited to: Review of ND/HND Curricular which is tailored to achieve fundamental skills, knowledge and experiences that must be covered in order for a graduate(s) to be qualified. Couple of years ago, the HRORBN sought the collaboration of NUC and constantly and consistently continues to follow up the issue of BSc HIM at the Commission for approval.

Glad to let you know that, the HRORBN in collaboration with NBTE has successfully reviewed ND/HND curricular. The review was effected from 28th November to 3rd December, 2022 at NBTE Consult, No. 9 Kajuru Close, Unguwar Rimi GRA, Kaduna, Kaduna State. The curricular were reviewed to meet the current needs of the profession and Society in general. During the review, emphasis was laid on the current trend and global best practices in HIM as obtainable globally. The areas such as e-Health (Electronic Health Records and informatics) and other relevant specialization were

satisfactorily dealt with.

The recently released CCMASS by the NUC is the product of the efforts of the HRORBN put in place to salvage the image of the profession. This great achievement is a foundation for the effective growth of the profession as many Universities including National Open University have been waiting for the

The reviewed curricular would expose the graduates to sound skills, knowledge and experience

CCMASS to run BSc. HIM in their respective Universities. Although, the CCMASS is 65% (105 Units) presently, the HRORBN is working round the clock to ensure it is 100% complete by inputting the remaining 35% (45 Units). All the courses omitted in the document will be satisfactorily captured as part of the 35% (45 Units).

This development would end the era of exodus of professionals to foreign countries for BSc in HIM; cutting down the effect of foreign exchange, taking risk of travelling by Road, risk of rampant insecurity and difficulties of learning the foreign language of

some countries. The issue/dichotomy of Officers and Technologist Cadre would naturally disappear with the approved CCMASS while there are great opportunities for holders of Msc and PhD in HIM as Universities would be seriously in need of human resources.

The reviewed curricular would expose the graduates to sound skills, knowledge and experience required to compete favorably with other health professionals in the health sector. It will also introduce them to current trends and global best practices obtainable for employment.

Notwithstanding, the reviewed curricular and newly released CCMASS may have some challenges as presently we do not have enough manpower to operationalized the documents. The number of HIM professionals with MSc and PhD in HIM is very limited. Therefore, the intellectual content of the documents are far reached, but having adequate personnel/manpower to impact it is another problem.

In conclusion, the HRORBN still has a role to play in organizing workshops/seminars and tutors courses to update the knowledge and skills of the lecturers for positive impact of the documents.

Health Information Management Professionals Critical to Quality Data

By Abu Useni and Gimber Zekeri

High quality standard and reliable Data could only be guaranteed, if Health Information management professionals were appropriately employed.

This observation came from Chairman, Health Records Officers Registration Board of Nigeria, Hon. Ibrahim Jibrin Sokoto.

The Chairman spoke when he led a delegation of top management

staff of the Board and other stakeholders on a courtesy visit to the Executive Director, National Health Care Development Agency headquarters in Abuja.

He, therefore, called for the inclusion of Health Information Professionals in the scheme of affairs of the Primary Health level.

Similarly, Registrar of the Board, Alhaji Babagana Mustapha, stressed it was important to include members of the profession in the scheme of affairs to enhance efficient Data management at the

primary health care levels in the country.

Executive Secretary, National Primary Health Care Agency, Dr. Faisal Shaib, said the Agency was planning to contact the Board to nominate HIM professionals to participate in highly demanding decision programme coming up soon.

He described the visit as timely and important, saying, the Agency had always engaged and shall continue to enhance HIM professionals in its activities.

ADVERTORIAL

A COMMUNIQUÉ ISSUED AT THE END OF A 2-DAY WORKSHOP ON THE UTILIZATION REVIEW OF ICD-10 AS DETERMINANT FOR THE IMPLEMENTATION OF ICD-11 IN NIGERIA ORGANISED BY THE HEALTH RECORDS OFFICERS' REGISTRATION BOARD OF NIGERIA (HRORBN) IN COLLABORATION WITH ASSOCIATION OF HEALTH RECORDS AND INFORMATION MANAGEMENT PRACTITIONERS OF NIGERIA HELD ON 13TH & 14TH SEPTEMBER, 2022, AT OLD OSGF CONFERENCE HALL FEDERAL SECRETARIAT, ABUJA.

Preamble

At the just concluded Workshop on the utilization review of International Statistical Classification of Diseases and Related Health problems (ICD-10) and introduction to and adoption of ICD-11, health information management professionals and stakeholders in health data management converged to deliberate extensively on the stage of utilization and internalization of ICD-10 and implementation of ICD-11.

The workshop had the theme "Utilization Review of ICD-10 as Determinant for the Implementation of ICD-11 in Nigeria", with the objective to appraise the level of operationalization of ICD-10 and guarantee successful migration to ICD-11.

Scientific papers were presented and exhaustively discussed. At the end, following observations were made:

- i. So far, implementation of ICD-10 across facilities in Nigeria was found to be low, leading to dearth of health data;
- ii. There is no uniformity in data collection tools and EMR-software solutions, resulting in

disjointed and fragmentation of health data in Nigeria;

- iii. There is inadequate training and retraining for clinical coders;

- iv. There is inadequate policy formulation and implementation on health data management at all levels of healthcare in Nigeria;

- v. There is lack of synchronization between DHIS-2 data elements and ICD codes.

Based on the above observations, the following recommendations were made:

- i. That facilities at all levels of healthcare key into the utilization of ICD-11 as the primary tool for collecting and reporting healthcare data in Nigeria. Therefore, there is need for Federal Ministry of Health, World Health Organization, Regulatory bodies, all facilities, and other stakeholders to ensure full implementation of ICD-11 to guarantee comprehensive health data collection in Nigeria.

- ii. There is need for FMOH and HRORBN in collaboration with NITDA to work towards the adoption of uniform EMR software for the country.

- iii. The FMOH and HRORBN in collaboration with WHO should organize training workshop(s) for operationalization of ICD-11

in Nigeria.

- iv. The HRORBN in collaboration with FMOH and other relevant bodies to develop National policies on Health Records and Information Management practices to guide the management and use, retention and disposal of health records in Nigeria.

- v. The FMOH to work with HRORBN to ensure synchronization between DHIS-2 and ICD-11 for effective data collection at all levels of healthcare services.

Conclusion:

It is our strong believe that if all stakeholders come together towards implementing these recommendations, we can achieve a successful implementation of ICD-11 as a tool for data collection and reporting in Nigeria. This will ensure quality healthcare data that will be adequate for clinical decision making, managerial functions and healthcare policy development at all levels. It is pertinent to note that quality healthcare service delivery can only be guaranteed through high quality data collection and management.

Board Makes Case For Inclusion Of Licensed HIM Professionals On Hajj Medical Team

By **ABU USENI**

The Registrar/CEO, Health Records Officers' Registration Board of Nigeria, Alhaji Babagana Mustapha has called for the engagement/inclusion of Health Information Management professionals in the Medical Team of Hajj exercise in Nigeria. Babagana made the call during a courtesy and advocacy visit to the Chairman, National Hajj Commission of Nigeria, Alhaji (Barr) Zikirullahi Kunle Hassan at the Hajj House, Abuja, recently.

In his address, Babagana emphasized the need of having the professionals as part of the medical team as this will greatly strengthen health data management practices and also support the commission in using scarce resources to plan and make informed decisions. He went further to reiterate on the involvement of relevant stakeholders, as healthcare delivery service system was a team work concept devoid of rancour. In his bid to enlighten the Chairman and the management team of the Commission, Babagana buttressed the

fact on the creation of database for future reference, knowledge management for hajj medical processes, assisting the Commission in data analytics of disease occurrence and process and providing the premises to plan and improve the health of the pilgrims staff and the professionals alike, were all parts of the benefits of having Health Information Management professionals on board.

Babagana emphasised the position of health records security, medical confidentiality, patient safety and improved healthcare services to the pilgrims and the country at large.

On the Registrar/CEO's entourage, representatives of the Association of Health Records and Information Management Practitioners of Nigeria (AHRIMPN), Alhaji Wada Aliyu and Mr. Adeleke Ibrahim Taiwo (AIT) also learnt their voices to his request as they emphasised on the significance of engaging trained and licensed HIM professionals for quality health data management. They went in-depth to expound the consequences of engaging non- HIM professionals as this threatened the quality of health data,

thwarts research process and may even lead to preventable deaths. It would be recalled that World Health

Organisation (WHO) recognises HIM as one of the six building blocks in Health care service.

Chairman, National Hajj Commission of Nigeria, Alhaji Zikirullahi Kunle Hassan, assured the Board that the visit will be the beginning of a synergy and bond between the two Agencies as it will not be taken for granted, as such noble effort will not be in vain. He acknowledged the existence of the Board as a creation of the law which should be allowed to perform its statutory duties in accordance to the dictates of the law, establishing it. He also reiterated the commission's commitment to quality representation of capable professionals which include HIM practitioners in the hajj medical team.

Zikirullahi in rounding off his speech allayed the Board of its fears by creating a liaison with the Commissioner in-charge of Planning Research and Statistics of the Hajj Commission, Sheikh Suleiman Momoh for necessary assistance and updates.

LIST OF ACCREDITED HEALTH INFORMATION MANAGEMENT TRAINING INSTITUTIONS IN NIGERIA AS AT APRIL, 2023.

S/N	INSTITUTION	ADDRESS	STATUS
1.	BORNO STATE COLLEGE OF HEALTH TECHNOLOGY	MAIDUGURI, BORNO STATE	ACCREDITED

EHR; The Way To An Efficient Service Delivery: HRORBN CEO

By **ABU USENI** and **FAUZIYA JIBRIN**

“The retreat of Electronic Health Records Installation/ Training of the Health Information Management trainers is apt and timely as Information and Communication Technology keeps developing and has become a necessity which must be embraced in every aspect of the medical and allied professions; most especially Health Information Management (HIM) which deals with patients’ information”. This was recapped by Alhaji Babagana Mustapha, Registrar/CEO, Health Records Officers’ Registration Board of Nigeria, while delivering his speech on the occasion of a Two-day Coordinators Retreat and Installation/Training on EHR software, held recently at the National Hospital, Abuja.

He emphasized the efficacy of patients’ information being documented electronically with the aid of ICT for reliability, accuracy, easy access and real time communication; whereas these cannot be achieved through the traditional /paper health Records System, despite the latter being herculean and tedious. Babagana, therefore, called on Health Information Management Trainers to be pro-active in a technological driven society so as to be in line with current trends and practices in order to improve the standard of our trainings thereby making our graduates employable.

Registrar/CEO Alhaji Babagana Mustapha

The aim of the retreat was to install the EHR training software, train the trainers and to discuss relevant issues of concern to HIM training in general, while encouraging stakeholders to inculcate sound knowledge besides skills into our graduates; as this will help protect and promote the standards of Health Information Management practice in the country. While stressing the need to uphold the pride, honour and integrity of the noble profession by respective stakeholders to compliment the efforts of the Board, Babagana also informed the participants of the

collaboration between the National Board for Technical Education (NBTE) and the Board for the review of curricular for National Diploma (ND) and Higher National Diploma (HND) as part of the Board’s strides to strengthen the HIM training standards.

Head, Education Department, Hajia Halima, Ahmed Haruna stressed on the need for exposure of students to and acquaintance with the software at the training institutions before graduation, as this makes the job easy for an effective health service at the health facilities.

NSUK Gets Approval To Commence BSc In HIM

By **ABU USENI**

Nasarawa State University, Keffi set to commence BSc in Health Information Management. Prof. Y.B. Ngwai, said this while on a fact-finding mission to the Health Records Officers Registration Board of Nigeria head office, Abuja.

The academic Don who led the school delegations to the Board, stated that the senate of the university approved the programme since 2020, before COVID-19 set in. He said that structures are already in place, as they have identified resource persons and are in the process of recruiting them for the kickoff of the program.

Prof. Ngwai said that they were in the Board for a fact-finding mission which border on the

cost implications of running the programme and the requirements for accreditation, saying, the department will be domicile in the faculty of health sciences.

The Board Chairman, Hon. Ibrahim Jibrin Sokoto while welcoming NSUK delegates to the Board, stated that the school had taken the lead by being the first public university to commence the BSc in HIM program in Nigeria, pointing out that it was an historical achievement.

The Registrar of the Board, Alhaji Babagana Mustapha while responding to the school's delegation, stressed that it was expected that the university forwarded the list of their admitted students for indexing.

Alhaji Babagana said the students are expected to seat for the part

one Board professional licensing examination after their 300 level programme to qualify them into 400 level, and also to seat for part two of the exams after their 500 level before proceeding for National Youth Service Corp.

He stressed on the need of HIM demonstration room, ICT, Anatomy lab, Library, E-library and lots more being requirement for professional accreditation, which was different from NUC accreditation.

The Registrar appreciated the Vice Chancellor of Nasarawa State University, Keffi, Prof. Suleiman Bala Muhammed and the entire governing Board for making the dream a reality.

He called on other Universities to emulate the gesture as the NUC benchmark was out and ready for implementation.

NSUK delegation led by Prof. Y.B. Ngwai to HRORBN on fact finding mission

An Insight Into Examinations And Records Department

An insight into departments and units of the Board, an interactive segment of The HRORBN News Magazine had on its spotlight, the Head of Examinations and Records, Mr Tobechukwu Vicent Uba, who is ready to enlighten the public on the department's activities.

By Ufedo Lovelyn, Gimba Zakari and Fauziya Ibrahim

HRORBN NEWS MAGAZINE: Kindly identify yourself.

Mr Uba: My name is Mr. Tobechukwu Vicent Uba. I am a graduate of Banking and Finance, with MSc in Business Administration and a satisfied Accountant (ANAN). I am the Head of Examinations and Records Department of the Board.

HRORBN NEWS MAGAZINE: Sir, lets know the functions of Examinations and Records department and what it entails?

Mr Uba: It is the responsibility of the Board to develop the curricular, which schools use as guidelines for training students for the HIM program and ours is to implement through examining the students. That is where the department comes in; our role specifically is to conduct and monitor the examination process following the board-developed curricular from setting of questions to moderation and final export to schools for written examinations and thereafter for onward marking and release of results. Records of students result sheets are also domiciled in the department, hence the name, Education and Records Department. For an individual to become a licensed professional as part of the core mandate of the Board, they must have undergone some learning process and also passed the test as prescribed by the standard of the Board.

HRORBN NEWSMAGAZINE: What are the categories of

Mr Tobechukwu Vicent Uba, Head Examinations & Records Department

examination conducted by the Board in an academic year?

Mr Uba: The Board conducts three categories of examinations in a year.

(A) The Professional Diploma Licensing examination is conducted every first week of July.

(B) The National Diploma (part II) and the Higher National Diploma (part II). Those who have obtained a Bsc in Health Information Management are in the part II category, scheduled every October.

(C) The re-sit of all the aforementioned examination is conducted every first week of February.

HRORBN NEWSMAGAZINE: What are the processes involved in conducting the Board examination?

Mr Uba: The process starts by

sending out notification letters for registration to the eligible students in the schools running the program, and such notification has an expiry date or deadline. Upon expiration, all registration details would be available as data for the department to start verification, followed by the moderation stage; The moderation phase has three stages: Firstly, the Board determines a school qualified to be a centre; the minimum number of students that makes a school qualified to have a centre is thirty (30) except for a Special centre which is very rear. This is followed by moderation of examination questions by the consultants on examination who are mainly Professional lecturers. Finally, indication of the papers and the various centres followed by printing and packaging for the courier services providers for despatch. All schools are

expected to get these materials within two weeks of the examination.

HRORBN NEWS MAGAZINE:
What is the timeline for writing the examination?

Mr Uba: The examination is scheduled for three days, starting from Tuesday, Wednesday and Thursday, with arrival day on Monday and departure day on Friday; for invigilators and officials. The students write two papers daily, morning paper from 9 am to 12 pm and the afternoon paper from 2 pm to 5 pm. Before now, examinations commenced on Monday, but due to insecurity challenges in the country, especially in the case of South East's sit at home on Mondays, the Board out of its magnanimity rescheduled the arrival days of those crisis areas from Monday to Sunday, thereby altering the examinations commencement date to Tuesday.

HRORBN NEWSMAGAZINE:
How many courses do the Board offer for the professional exams?

Mr Uba: The Board offers (6) six courses which are: Health Records Management(HRM)

Clinical Coding (CCD).

Health Planning Management (HPM)

Computer Science (CPS)

Biostatistics (BSH)

Anatomy (ANP).

HRORBN NEWSMAGAZINE:
What is the rate of the students' performances generally?

Mr Uba: The general performance of the students can be better, which has been of a great concern to the Board.

HRORBN NEWSMAGAZINE:
What is the cause for the failure and the effort the Board is putting in place to curb the mass failure?

Mr Uba: The Board had summoned the schools to a round table deliberation to investigate the problem and come out with positive

resultant effects, which we have sent a wake-up call letters to schools on that note. Investigations show that most lecturers of the schools are not domiciled within the school environ. There is also the issue of an HND graduate teaching the current HND students or a single lecturer taking almost five courses. All these puttogether are part of the result in the failure of examinations written by students. Moreover, schools do not use the Board's curriculum but produce hand-outs for students which do not conform or meet up with guidelines in the curricular which is a major setback. Consequently, any school that fails to meet the accredited guideline is sanctioned as part of the measures to curb examination failure in schools. The Board also calls for retreat annually for all provosts and Heads of Department to discuss the abnormalities, investigate and proffer a way forward in curbing the mass failure.

HRORBN NEWSMAGAZINE:
What are the major challenges facing the examination process?

Mr. Uba: One of the challenges facing the examination process is the registration period, is lateness in the registration process by schools which is a drawback tactic, and this act negatively affects the whole exam preparation process. Examination funding is realised from payments made by schools for early and easy preparation, so the earlier their payments are made, the better it is for the Board. Another challenge is with invigilation; the aim of invigilation is defeated when most invigilators are after money, and this adversely affects the process.

Lastly, the issue of exam materials reaching their destination on time, likewise when returning the materials to the Board. Sometimes, the materials get to their various destinations late, and we have to keep calling the courier service provider, other times, when we are about rounding off marking, that is when some bags

will arrive, which is also a significant setback and challenge to the entire marking process. Given the above, as stated earlier on the late registration challenge from the schools, we are also faced with the manual entry of the registration process because internet registration is still a work in progress.

HRORBN NEWSMAGAZINE:
What could be the possible solutions to these problems?

Mr Uba: Regarding the late registration, the Board resolved that exams will commence based on the arrangement; whether schools are on time or exceed the time frame, the Board will proceed with the stipulated time. Also, two weeks is given for delivering the exam materials, and the Board will sanction invigilators that compromise during duty. Preparation and completion of exams should be aided by an I.T. developer and software developed to ease the completion of results.

HRORBN NEWSMAGAZINE:
What is the cost of registering for the exams?

Mr Uba: Professional Diploma is N40,300. Re-sit a paper is N15,300, while 2-3 papers is N22,300 and re-sitting all papers is N28,500.

PART I, N45,300. Re-sit a paper is N17,300, while 2-3 paper N30,300 and all papers is N40,300.

PART II, N56, 300. Re-sit a paper is N20,300, while 2-3 paper N32,300 and all papers is N43,300.

HRORBN NEWS MAGAZINE:
We are in a digital era; what is the Board doing as regards digitising their exams?

Mr Uba: The Board is currently working on a software program to that effect and hoping to test-run it this year. However, most of the questions are practical based which will be difficult and herculean a task to achieve with CBT.

Thank you very much for your time sir.

Some Executive Members of the Cooperative

Multi-Purpose Cooperative hit N4.8m interest

By Ify Nwankolo and Hulera Idris

Health Record Staff Multi-purpose Co-operative Society has declared N4.8 million interests from total investment. It also revealed that there were 172 active members as at 31st December 2022.

Treasurer of the Cooperative and Head of Finance and Accounts Departments, Hajia Salamat Queen Jimah explained that the cooperative operated three accounts: regular loan account, revolving loan and commodity loan accounts. She spoke on the financial status of the society at its inaugural general meeting.

Looking back, Interim President

of the cooperative and Head of Reform Coordination and Improvement Department, Mr. Abdulmalik Saidu, said the Board's multi-purpose co-operative society started operation in 2016.

He explained that the purpose was to improve the Board's staff welfare through and low interest loans and other welfare benefits contained in the by-law.

He called on all stakeholders to make meaningful contributions to move the cooperative forward in the drive to attain its objectives, and apologized for the delay in the release of co-operative by-laws due to technicalities and expert inputs.

He said the cooperative financial activities were disbursements of

loans at negligible interest rate. He listed challenges facing the society to include lack of operational tools and office; member's involvement in external loans, irregular remittance of deductions by IPPIS and pressures from members applying for loans.

Auditor of the Co-operative and Head, Procurement Department, Mohammed Musa Ose, advised stakeholders to be mindful of what they say and be constructive in their contributions to move towards achieving its goals and assured that staff money was in safe hands.

Stakeholders resolved that interest be reinvested in home appliances or smart loans with more interest rates.

My Sojourn Into HRORBN

Abuja has always been home, though being a resident didn't come to mind until my appointment as the Head of Department of Human Resource Management of Health Records Officers' Registration Board of Nigeria. Coming from a cosmopolitan state (Borno State) where cost of living compared to the Federal Capital City is incomprehensible as it is relatively cheap in every sphere: from accommodation to feeding to clothing to paying of school fees and other sundry bills, I didn't think I would be able to fit in not until I made up my mind in accepting the reality on ground.

Upon receipt of my appointment letter, my first thought was going with the Rotary Club four-way test of the things we think, say or do, Is it the truth? Is it fair to all concerned? Will it build goodwill and better friendship? Will it be beneficial to all concern? As this geared me into looking inwards to creating a department second to none in the Board. In other to hit the ground rolling, discussions/meetings with staff members of the department on ways in restructuring without inhibitions or obstructing the originality of the department were sought. Meetings upon meetings which culminated in having the general staff in attendance on ways to move the Board forward and towards an enviable height was held to the delight of the staff.

Armed with a Bsc in Public Administration and having worked as an Administrative staff in Bama local Government

through the Nigeria Security and Civil Defence Corp to the University of Maiduguri Teaching Hospital all in Borno, Lagos and Enugu State respectively spanning over twenty-seven years (1995 -2022). I assured myself that I am well equipped for the onerous/herculean task as I am ready to deliver and contribute my own quota to the development of the Board.

Though not too long in Board, a lot has been achieved since assumption of office, I made sure diligence; efficiency and hard work are topmost in my agenda. Staff welfare is one area I do not toy

with as staffs are well taken care of and compensated as at when due. I look forward to having a great working environment and with the staff that at the end of my sojourn here, posterity would not only nod its head and but affirm the roles I played to ensure a non-toxic working environment as negativity would have been a thing of the past.

God bless Nigeria, God bless HRORBN

MOHAMMED SHETTIMA,
Head, Department of Human
Resource Management

CODE OF ETHICS FOR HEALTH INFORMATION MANAGEMENT PRACTITIONERS

A code of ethics is the laid down professional's ethical guidelines and best practices set out to follow for honesty, integrity, and professionalism. It is for members of a profession, and violating the code of ethics can result in sanctions including termination

It provides a common set of rules or standards for all in the profession to adhere to. It defines best practices for the profession. It provides a basis to meet compliance requirements for the profession. It provides a legal standard for the profession.

Code of ethics could also be viewed as the ethical obligations of the health information management professional that includes the safeguarding of privacy and security of health information; appropriate disclosure of health information; development, use, and maintenance of health information systems, health information; and ensuring the accessibility.

AHIMA provided the following as part of Code of Ethics of Health Information Management;

1. Advocate, uphold, and defend the patient's right to privacy and the doctrine of confidentiality in the use and disclosure of information.
2. Put service, health and welfare of persons before self-interest and conduct oneself in the practice of the profession so as to bring honour to oneself, their peers, and to the health information management profession.
3. Preserve, protect, and secure personal health information in any form or medium and hold in the highest regard health information and other information of a confidential nature obtained in an official capacity, taking into

account the applicable statutes and regulations.

4. Refuse to participate in or conceal unethical practices or procedures and report such practices.
5. Use technology, data, and information resources in the way they are intended to be used.

**Mrs. Halima Ahmed Haruna, Head,
Education Department**

6. Advocate for appropriate uses of information resources across the healthcare ecosystem.

7. Recruit and mentor students, peers and colleagues to develop and strengthen professional workforce.

8. Represent the profession to the public in a positive manner.

9. Advance health information management knowledge and practice through continuing education, research, publications, and presentations.

10. Perform honourably health information management association responsibilities, either appointed or elected, and preserve the confidentiality of any privileged information made known in any official capacity.

11. State truthfully and accurately one's credentials, professional education, and experiences.
12. Facilitate interdisciplinary collaboration in situations supporting ethical health information principles.
13. Respect the inherent dignity and worth of every person.

Halima Ahmed Haruna(RHIMO) & Mustapha SaiduSuleman(RHIMO)

Substandard Products Pose Obstacle to eHealth

Abubakar Magaji Gidandikko (RHIM, Msc HIM, Ph'd in view) Head, Professional Matters. HRORBN

Head, Professional Matters, Health Records Officers Registration Board of Nigeria, Abubakar Magaji Gidandikko, has said that substandard products were a major obstacle among hospitals using electronic health records.

He also asserted that inadequate policy and regulatory environment for electronic health records was also an impediment for the encouragement and sustenance of innovations and use of existing and emerging eHealth products.

He said these were despite available opportunities which Information Communication and Technology presented in supporting electronic health records.

He recalled that the Federal Ministry of Health and Federal Ministry of Communication Technology, led multi-sectorial and stakeholders, including HRORRN inclusive, to leverage on the enabling environment component of the World Health Organisation, (International Telecommunication Union eHealth strategic Toolkit) for the development of National Health Information Technology Strategic Framework, 2015-2020, which was reviewed last year.

He explained that the strategic document was borne out of recognition of the opportunities that ICT presented to support electronic health records. He also observed that although World Health Assembly in 2005 recognised wide spread in the use of Information and Health

Communication Technology in the Health Sector, there was little or no coordination and passed resolution 58.28 on adoption of eHealth, where member states were urged to draw up long term strategic plans for development and implementation of digital Health services to strengthen their health system.

He also recalled that in 2010,

the World Health Organisation regional Committee meeting for Africa, further urged member states to strengthen the health system through the creation of appropriate enabling environment for digital health governance regulation, human resources development standards and infrastructure and appropriate services and applications.

Abubakar Magaji Gidandikko, Head, Professional Matters

ADVERTORIAL

A COMMUNIQUE ISSUED AT THE END OF A 2-DAY COORDINATOR'S RETREAT/SOFTWARE TRAINING ORGANIZED BY THE HEALTH RECORDS OFFICERS REGISTRATION BOARD OF NIGERIA FOR THE COORDINATORS OF HEALTH INFORMATION MANAGEMENT (HIM) TRAINING INSTITUTIONS HELD ON 22ND -23RD NOVEMBER, 2022, AT HALL A, TRAUMA CENTRE, NATIONAL HOSPITAL, ABUJA.

Preamble

At the just concluded Coordinators' Retreat organized by the Health Records Officers Registration Board of Nigeria for the coordinators of Health Information Management training Institutions where professionals and stakeholders in Health Information Management converged and interacted broadly to ensure improved, efficient, effective, and proficient service delivery by the training institutions. The theme of the retreat was: EHR - An Indispensable Tool in 21st Century HIM Practices-Train the Trainers. At the end of the two-day interactive engagement the following communiqué was issued.

i. That it is mandatory for teachers in HIM training schools to acquire the Continuous Professional Development Training (CPDT) Certificate to gain the requisite teaching methodologies required of a teacher.

ii. That the Board is collaborating with National Board for Technical Education (NBTE) to review the curriculum for National Diploma (ND) and Higher National Diploma starting from Monday 28th November, 2022.

iii. That Information Communication Technology (ICT) has become a necessary tool in attaining development in the entire sphere of our existence and must be embraced by Medical and Allied Professionals, particularly the Health Information Management (HIM).

iv. That globally, patient's information is handled electronically to engender effectiveness, efficiency, reliability and real-time communication, which cannot be achieved through the traditional/paper-based Health Records system.

v. That in year 2019 the Board developed Electronic Health Record training software to be used in training prospective professionals in order to strengthen their employment opportunities as

graduates trained to fit into any health facilities that have deployed e-health records system.

vi. The importance of ICT cannot be overemphasized. That effective and efficient healthcare delivery can only be better guaranteed in computerized environment.

vii. That the professionals must take the bull by the horn in ensuring a paradigm shift in Health Records and Information practice by changing the narratives through the adoption of Electronic Health Records (EHR).

viii. That mentorship is the best strategy in inculcating knowledge to the younger generation to suit the international practice.

ix. That the schools are reluctant in adopting or integrating ICT in their operations. This is reflecting in the quality of their graduates in terms of employment.

Observations from Training sessions

1. Lack of ICT skills is reducing the viability of the professionals and should be taken into consideration in the course of reviewing the curriculum.

2. The students graduating from the schools are performing below expectations.

3. Majority of HIM schools have internet connectivity problems.

4. There is no space for discharge summary on the EHR Software template

5. The student should be guided on EHR Software through the elementary stages on how to use excel and word documents. This will enable them to understand procedures on EHR Software.

6. There is no provision for Procedure Coding System (PCS) on the demonstration template. EHR Software without PCS is apparently incomplete.

7. The graduates of our training schools are not presentable as a result of lack of effective computer skills. The schools should use best brains to teach introduction to computer science and how to use

Cont'd on next page >>>

<<< Cont'd from previous page

computer applications.

8. There is no harmonization between the HRORBN EHR and Coding Classification.

9. Participants observed that some lecturers are playing dual functions in the training institutions such situation is not good for the profession.

10. There should be serious penalty on delaying accreditation renewal.

11. The project topics are also issue of concern. In most cases students present project topic that lack relevance to the HIM practice.

12. The participants have reservation on the manner of preparing the marking scheme as the Board prepares marking scheme after the examination has been written which is contrary to what is obtainable in the higher institutions.

13. The mass failure in the schools required a strong strategy.

14. It was observed that adoption of pre-national examination will help greatly in reducing massive failure and stem examination malpractice.

15. SIWES needs to carry scores in the course units in the new curriculum

16. There should be clear fee stated for students induction

17. CBT system would help in reducing the constraints faced during examination.

RECOMMENDATIONS

The retreat proposed the following recommendations:

1. ICT skills should be given prime consideration during the curriculum review.

2. The stakeholders should rise to their responsibility in protecting the image of the HIM profession. That the professionals should work assiduously to do everything possible within the realm of law to protect and promote the standard of HIM practice.

3. The entire training institutions should make provision for functional internet services.

4. There should be provision for discharge summary on the HRORBN EHR Software

5. The basic version of HRORBN EHR Software should be created, to make it easy for students training in the schools.

6. Provision should be made for Procedure Coding System on the HRORBN EHR Software template.

7. Persons with requisite intellectual computer

skills should be employed to teach introduction to computer in other to enable the students to assimilate the dynamism of computer applications easily.

8. The HRORBN EHR and coding classification should be harmonized.

9. That letters should be sent to the training institutions against lecturers playing dual functions in the training institutions.

10. That the Board should provide an automatic model of erasing schools from the board portal at the expiration of accreditation to disable the schools from having access to any of the Board's activities until their accreditation status is renewed.

11. The students' project topics should be well vetted before approval.

12. The examination questions and marking scheme should be set at the same time.

13. That Students whose names are not in the examination attendance sheets from the Board will be disqualified from writing the Board exam,

14. That Student without the examination slip and picture on it will also be disqualified to write exam,

15. That the period for indexing is September of the current year to March of the next year.

16. That henceforth, Re-Indexing has been abolished; therefore, candidates are to be presented once for indexing,

17. Schools/Colleges are advised to admit only students with the required qualifications

18. The participants recommended that students who failed semester examination for two consecutive period are made to repeat the class as applicable in the sister professions,

19. Pre-national/Mock examination should be conducted by the schools before presenting successful candidates for Board's National Examination.

20. Students Industrial Work Experience Scheme (SIWES) should form part of the student's academic assessment,

21. Induction fee: ten thousand Naira Only (N10,000.00) should be paid to the board, while schools should be left to charge on their own.

22. The CBT examination format should be designed for professional license examination.

The Registrar HRORBN, Alh. Babagana Mustapha and Director, Corps Mobilization, Mrs. Wallida Isa Siddique

Deploy Corps Health Information Management Professionals to Hospitals, Health Institutions

By Abu Useni

The Registrar/CEO, Health Records Officers Registration Board, Alhaji Babagana Mustapha, has appealed to National Youths Service Corps Directorate to deploy Corps Health Information Technologist and Health Information Officers to hospitals and HIM institutions for their primary assignments.

Alhaji Babagana made the appeal while on a courtesy visit to Director of Corps Mobilisation, Mrs. Wallida Isa Siddique at the National Youth Service Corps Headquarters, Abuja.

He explained that Health Information Technologists and Health Information Officers

licenses were required for Corps mobilization.

He further explained that there were different categories of HIM licenses, pointing out that Health Information Technician license was for National Diploma and Professional Diploma holders, while Health Information Technologists and Health Information Officers was for Higher National Diploma and Bsc holders respectively.

He charged the NYSC to adhere to Health Information Technologist and Health Information Officers license for Corps mobilization.

He also said there was a change of signature on the license as a result of fake licenses because the former signature was plain and appealed

that the Monitoring and Evaluation team of the Board be allowed to visit NYSC Orientation camps across the country to sensitise HIM Corps members.

Director, Corps Mobilisation of the National Youths Service Corps, Mrs. Walida Isa Siddique, while assuring that the NYSC would collaborate with the Board to ensure that the right thing was done, advised the Board to sensitise schools on the procedure and requirements for the enlistment of HIM graduates on the NYSC programme.

She also requested the Board to present 40 samples of HIM practicing license with the Registrar's signature for easy identification to all NYSC offices across the country.

AN INSIGHT INTO THE INDEXING UNIT

An insight into departments and units of the Board, an interactive segment of The HRORBN News Magazine once again beamed its spotlight on the Indexing Unit. The unit is headed by Mustapha Suleiman a staff of HRORBN, a graduate of Health Information Management with masters in the same field in view, has been an employee of the Board for eight years having worked with Professional Development Licensing Unit before being deployed to Indexing Unit.

Mustapha Suleiman, Head Indexing

By Ifeanyi P. Nwaokolo and Hulera Idris

HRORBN NEWS MAGAZINE: *What is the general definition of indexing, and how does indexing relate with the Board?*

ANSWER: Indexing generally refers to data organisation according to a specific scheme or plan. The term has various uses, in Information Technology, it encompasses making information more presentable and accessible.

Indexing as regards the

procedure in the Board can be defined as allocating a unique number to a candidate enrolled to run Health Information Management in an accredited institution in Nigeria. The unique identification number given to the enrolled candidate contains about 4-5 special variables. The number is designed in such a way to include the name of the Board (in Abbreviation), the name of the school enrolled, the year of admission and the serial number identifying them as admitted HIM students. The Board currently runs BSc, HND, ND,

and PD. The indexing code for students (an initial defining the kind of programme) is as follows: BSc as BSc, HND as HD, ND as ND and PG as PG.

HRORBNNEWSMAGAZINE: *How Can a student identify these codes?*

ANSWER: Series of trainings are on-going to educate the lecturers on the whole meanings of the index numbers and codes with the expectation that they will in turn, tutor the students to define and identify the variables.

HRORBN NEWS MAGAZINE: *Is it permissible for a candidate to be allowed to write an exam if he/she did not have an index number?*

ANSWER: No! The Board will only allow schools that complete its requirements to write an exam as this helps to detect fakes and forgeries.

HRORBN NEWS MAGAZINE: *Can you describe in detail step by step the functions of the Indexing unit?*

ANSWER: The school writes to the Registrar requesting for indexing of its students, which goes through a thorough procedure before getting approval:

1. Request letter from the school

<<< Cont'd from previous page

2. Verification of student credentials submitted
3. Confirmation of payment for indexing
4. Enrolling/data entry of the qualified candidates on indexed list
5. Publishing of eligible index list
6. Forwarding the list to the Registrar for approval
7. Releasing it to the school

HRORBNNEWSMAGAZINE: *Can students be indexed without such school being accredited?*

ANSWER: You can't index students without the school being accredited; it runs simultaneously. The school must have valid and current accreditation to have its students indexed. It is not likely as it's a laid down rule of the Board. Upon reception of the request letter, we send same letter to the Education department to verify the school's eligibility.

A new policy was implemented during the 2022 stakeholder's retreat towards the beginning of the academic session. The simple approach is that schools should only pay for qualified students because the fees are not refundable. This new policy was implemented partly because of international/foreign trained students as their indexing requirements are quite different from that of the indigenous or home based trained students.

HRORBN NEWS MAGAZINE: *What are the requirements for international/foreign trained students to practice in Nigeria?*

ANSWER: Foreign trained

The unique identification number given to the enrolled candidate contains about 4-5 special variables

graduates of HIM who intend to practice HIM in Nigeria are expected to make a formal application either by requesting for membership, licensing registration or indexing. The request letter will accompany their credentials, evaluation report of O'level certificate, indigene certificate, admission letter, a copy of the transcript and school certificate, evidence of 6 months of industrial training in any Nigeria tertiary institution to equate themselves with Nigeria procedures of HIM practice. International/ foreign trained students pay double for indexing which are 30,600, as a whole lot is put place to get everything is set.

Each country is trying to encourage its citizenry to exploit the opportunity posed by the academics and practise resources within the country to enhance their productive and efficiency. The Board on its own part is poised to promote the HIM practitioners to patronise Nigerian-accredited institutions since the Board has developed the curriculum and syllabus and supervises its implementation and exhibition within the country. Board is 100% accessible during the period of the programme and study. The reason their certificates have to undergo

valuation, making the charges double, to discourage foreign trips for study, a way of making them to believe and have faith in our schools. This way, foreign trained students are encouraged to know and learn about this new, revised, reviewed and improved curricular. The current Registrar fought vigorously for approval for BMAS, which is the benchmark for the curriculum to be implemented with the massive influx of universities vying to run the programme.

HRORBN NEWS MAGAZINE: *What action is the Board taking to curb the abnormality of different students having same index numbers?*

ANSWER: We have not encountered such in recent times as there is tremendous improvement in our update of information digitally, innovations to ensure efficiency and effectiveness. Currently, indexing is centralised with a single database as opposed to previously, where we had a decentralised system with a different database. This has curbed the issue of multiple students having a single index number.

HRORBN NEWS MAGAZINE: *What are your challenges?*

ANSWERS: We are currently working on correcting the issue of schools complying with the stipulated Board's indexing timeline and removing re-indexing to eliminate the glitch that comes with it, like slipping unqualified students in through the backdoor.

Thank you for your time.

By Shamsiyya Abdullahi

Life they said evolved around danger and most working environment is prone to minimal or fatal accident as the case may be. On that noted it will be pertinent to understand the importance of first aid in organization or working environment.

FIRST AID - is the first treatment given to a sick person or an injured person before the arrival of a doctor or full medical personnel is available, for instead, a wound, fracture, sprains, animal and insect bite, heat related illnesses, and cardiopulmonary resuscitation will be taken care of before taken to the hospital.

First aider is a person who has undertaken training appropriate to health related programme, they must possess a valuable certificate of competence in first aid at work emergency. Any other level of training or qualification that is appropriate to the health related.

The purpose of first aid in this context is to minimize injury within the working environment. In serious cases, first aid may be necessary to keep the victim alive. At this junction let us take a look at the guide to first aid in a working environment.

A PRACTICAL GUIDE TO FIRST AID IN THE WORKPLACE.

It's a legal requirement for employers and self-employed workers to have first aid arrangement in place of work. This guide tends to provide practical advice for appointing a first aider and useful resources to ensure employees are working in a safe environment. This guide would enable us to know the importance of first aid in an organization or working environment.

IMPORTANT OF FIRST AID IN A WORKING ENVIRONMENT

It prevents the escalation of illness or injury. First aid training helps employees learn to be more conscious of safety in the workplace, leading to

Importance of first aid in an office environment

reduce the number of accident and injuries. Minimizing risk to workers and decreasing workplace incident. Below are the importance's of first aid.

- a. It helps an ill person to recovery fast due to quick attention given.
- b. It protects the unconscious to become conscious.
- c. It saves live.
- d. It provides pain relief, if someone is give first aid in time, it help in reduce the chance of getting an infection.

KEY STEP OF FIRST AID.

- D-for danger; assess the situation.
- R-for response; check consciousness, check vital sign.
- A-for airway; open airway.
- B-for breathing; check respiration.
- C-for circulation; give chest compression.

HERE ARE SOME TIPS ON HOW FIRST AID CAN BE USED TO TREAT AN INJURED

PERSON.

1. To treat cuts and scrapes, apply gentle pressure, disinfectant and bandage.
2. To treat sprains, apply ice and compression at interval and keep the limb elevated.
3. To treat heat exhaustion, use cool fluids, cool cloths and shade.
4. To treat hypothermia; use warm fluids and warm covering.
5. To treat burns, determine the burn type and severity; cover the wound with loose cloth to prevent infection.
6. To treat fracture, keep the fractured area stable and immobilized, and apply a cold pack.

To be able to put all the aforementioned in practice, an experience and trained first-aider needs to be engaged in every working environment where there is no clinic or hospital for better output and quality service. Life is wealth. We need to be safe.
